Gorsch, Kendall vs. Bethany.
Bureau of Engraving and Printing League—Tigers vs. Cubs.
National Capital League—Bumgartens vs. National Capital.
Washington League—Imperials vs. Elites.
Alexandria City League—Hitchhikers vs. Cardinals.

The Shermons, following their victory of last week over the Continentals, last night felt chesty enough to show what they could do again and consequently proceeded to hand the Royals a wallop in two of the three contests of the match in the District Cupkin League. The Shermons won the first two games by 140 to 127 and by 125 to 102. The scores were close, it is true, but the games were won just the same, won from the Royals and it is not every team that can boast of winning two out of three from Pop Halley's crowd.

Chaconas Rolls Well.

Chaconas did the best rolling of the players in the Masonic League, knocking down 109, 117 and 139 for King Solomon against Lafayette.

The Palace five proved too good for the Columbians in the National Capital League, winning two out of three. Williams and Wood starred for the victors, and Mueller for the losers. Williams' scores were 115, 125 and 104, and the latter's 114, 122 and 108. Several other members of the two quints got counts of more than 100 in their contests.

PLANS FOR CO-OPERATION IN BUILDING AIR CRAFT

Rubber and Other Manufacturers
Ready to Give Government
Every Assistance.

Promises of co-operation with the government in its efforts to develop satisfactory Zeppelin type aircraft for the army and navy have been made by leading American aeroplane and rubber manufacturers with Rear Admiral David W. Taylor, chief constructor of the navy and head of the joint army-navy board investigating the dirigible problem. A preliminary survey of the materials and plants available was begun, and the manufacturers expressed belief that big aircraft similar to the German machines could be turned out.

It is regarded as probable that some method of centralizing the work will be necessary so that the facilities of all plants which can aid can be utilized. Representatives of the Connecticut Aircraft Company, the Curtiss Aeroplane Company and the Goodyear, Goodrich and United States Rubber companies have united in offering to the government every aid in their power in its campaign for adequate national defense.

Officials view the Zeppelin problem more as a commercial than a scientific one. With the funds available and the co-operation of commercial plants they appear to feel certain of their ability to construct ships that could defeat the performance of the German craft in durability and length of flight. The only dirigible craft for which the navy has contracted is a small semi-rigid machine for school purposes. It still is to be delivered to the aviation school at Pensacola.

TWO DIVORCES GRANTED.

Mrs. Hallie Merritt and Mrs. Grace L. Peine Win Decrees.

Mrs. Hallie Merritt has been awarded an absolute divorce from Caleb C. Merritt, said to be a wealthy resident of Maryland. The husband made no defense to the charges of misconduct alleged against him in the wife's petition, and in his answer declared that he wished to make amends to her "at least in a financial way." As the wife in her petition had not asked for alimony Justice Stafford inserted in the decree that the court had not considered the question of alimony. Attorney J. Athene Johnson appeared for the wife, while Attorney J. W. Denny of Baltimore represented the husband.

Justice Stafford also granted an absolute divorce to Grace L. Peine from William E. Peine. The costs of the proceedings as well as a counsel fee for Attorney Walter M. Bastian, appointed by the court to defend, were assessed against the husband. Attorney Harry A. Barker represented the wife.

\$16 Added to Conscience Fund.

A sixteen-dollar contribution has been made to the conscience fund. The money was inclosed in an envelope addressed to the Secretary of the Treasury and postmarked Ormond, Fla. No word accompanied the money save that it was for the conscience fund.

WANT TO KNOW NEEDS OF DANISH WEST INDIES

Commission to Investigate Is Called
for in Bill Prepared by Sena-
tors Providing Government.

Appointment of a commission to make an investigation into conditions and needs of the newly acquired Danish West Indies is proposed in a bill prepared by Senators Stone, Hitchcock and Lodge, to provide for provisional government of the islands.

The bill, prepared as a substitute for the State Department bill submitted to the House foreign affairs committee, would provide also for a provisional government in the islands, for administration of their affairs under the United States pending a report of the commission and further action by Congress, and it will be considered and reported by the Senate foreign relations committee tomorrow.

The proposed investigating commission would consist of the governor of the islands and two citizens of the United States, to be appointed by the President. The commission would be directed to conduct its investigation and make report to Congress within ninety days, with such recommendations as it may deem advisable for the good of the islands.

Would Vest Power in President.

Until otherwise provided by Congress the Stone bill would prescribe that all

powers now exercised in the Danish West Indian Islands be exercised by the President of the United States, so far as may be compatible with the changed sovereignty. To administer the government the President would appoint a governor to be either an officer of the army or navy, and such other officers as, in his judgment, may be necessary. To civil and judicial offices the President would be authorized to appoint resident citizens of the island, if he so desired, but all powers of the civil and judicial offices would be exercised in accordance with rules and regulations to be prescribed by the President.

Existing laws regulating elections and other local laws would remain in effect, but might be amended by the colonial council as now constituted in the islands, with approval of the President. Tariff regulations of the United States would be applied to the islands, provided that United States and Danish West Indian products would be interchanged free of duty. Exception would be made, however, on exportation of sugar to the United States, on which there would be levied an export duty of 18 a ton. The bill would appropriate \$50,000 for carrying out the transfer of government and authorize payment of \$25,000,000 to Denmark, the purchase price of the island territory.

Finds Trackman's Death Accidental.

A verdict of accidental death yesterday afternoon was reached by a coroner's jury at an inquest held at the morgue over the remains of Joseph Francisco, railroad trackman, who was run over by an engine Sunday while working in the yard of the Washington Terminal Company. It was testified that the engine was running at the rate of thirty miles an hour. Jurors were satisfied that the witnesses were mistaken, however, as the engine stopped before the tender reached the body. Relatives made arrangements for the funeral.

Are you having trouble with your skin?

Does your skin itch and burn? Or is your appearance marred by patches of eruption? There is no need of enduring such discomfort when Resinol Ointment usually stops itching at once and quickly makes the skin clear and healthy again. Doctors have prescribed Resinol Ointment for over twenty years in the treatment of skin affections. So you need not hesitate to use it, nor to recommend it to skin-tormented friends.

Resinol Ointment is so nearly flesh-colored that it can be used on exposed surfaces without attracting undue attention. Sold by all druggists.

Resinol

FOR three generations of dentists The S. S. White Dental Manufacturing Company has been headquarters for every variety of dental equipment and supplies. Engraved on chisels, excavators, forceps—on a hundred other tools on whose fineness of temper and micro-measured accuracy of design the dentist depends for the success of his work—the S. S. W. trademark has always carried with it absolute assurance of quality. For 72 years The S. S. White Dental Manufacturing Company has consistently co-operated with leaders of the profession in advancing the science of dentistry. The S. S. White laboratories have been centers of research work whence have come forth new implements, new materials, and new techniques which have enabled the American dentist to lead the world. For the dentist, it is just as important that his patient's teeth be cleaned with a reliable dentifrice as it is that they be filled with a reliable amalgam. Hence, as a logical extension of our service to the dentist, we have put the S. S. W. monogram on the best tooth paste which science can prepare. We offer S. S. White Tooth Paste to the dentist and to the general public with full confidence.

A Wholesome, Non-Medicated Cleanser

The whole purpose of a dentifrice is to help the tooth brush remove food deposits—to cleanse, and cleanse pleasantly. No tooth paste can rid the mouth of germs, because an antiseptic strong enough to do this would injure the delicate mucous membranes. Besides, mouth liquids are so constantly changing that the direct effects of an antiseptic cannot last more than thirty minutes. S. S. White Tooth Paste contains no drugs or chemicals, the effect of which is to corrode the teeth, irritate the lining of the mouth, or alter the secretion of saliva. It has an agreeable, clean taste and is extremely effective as a cleanser and in polishing and whitening the enamel.

Ask your druggist for S. S. White Tooth Paste. Write us for a copy of our booklet, "Good Teeth; How They Grow and How To Keep Them." This is the booklet which is now being used in many cities as a text book in the public schools.
